SESSION: 2025-26 BEST PRACTICE -I

“Donate blood and be a hero of someone’s life”

1. TITLE OF THE PRACTICE

Blood Donation

2. OBJECTIVES

- To create the consciousness of valuing voluntary service.
- To inculcate in the young minds about their voluntary action this will save or change the life of an unknown person.
- To develop awareness of indispensable voluntary donation of blood at crucial times to save lives.
- To promote the same congenial spirit in the peer group.
- To assuring the availability of any group of blood to the needy people at anytime.

3. THE CONTEXT

The noble act of donating blood periodically is a great human gesture. The message that donating blood voluntary is an important part on humans to express their concern or caring for the lives of others.

Now the need of blood has been increasing every moment of a minute. It is required during the emergency occasions like accidents, surgeries, to cure the chronic illness and also in the treatment of cancer and like that.

In this fast way of living life, regularly voluntary and healthy blood donors are needed in large number to make generous blood donations.

4. THE PRACTICE

Under the guidance of IQAC. Blood donation camp was organized in S.V.S.P.M, Roopangarh. The college has organized Blood Donation Camp with the collaboration of Krishnan Hospital, Roopangarh in college campus. Initially the volunteers maintained a list of Blood Donor with their blood group and College authorities donation camp. did all other necessary arrangement required for blood

The blood donation unit of J. L .N .Hospital Ajmer had come to S.V.S.P.M. Roopangarh Campus to collect the blood. All our students, teachers and villagers had come forward to donate blood. After collecting the blood, certificates of appreciation has given to the blood donor by the members of the blood donation unit. Volunteer or the donors did not accept any kind of monetary benefits.

Through these kinds of healthy practices many students got enlighten about the importance of blood donation. We hope that in future students will enthusiastically come forward and motivate others also to donate their blood to the needy in regular intervals.

5. PROBLEM ENCOUNTERED

Students sometimes found it difficult to explain concepts to villagers also. They have their own preconceived notions about blood donation as, if anyone donates blood the quantum of blood in the body decreases, some get high blood pressure, increase in body weight etc. In many occasions parents act negatively though their sons or daughters willingly come forward for blood donation.

6. CARE TAKEN

Students who have donated blood are given adequate nutritious food and sufficient rest. They are taken care by the college authorities properly.

7. RESOURCES REQUIRED

As per the requirement of the camp.

8. EVIDENCE OF SUCCESS

A leader can always be a doer. Similarly our principal and Staff both teaching and non teaching have donated blood. 45 units blood is collected. At the end of the campaign, college in-charge Mr. Ramesh Meena expressed his gratitude to all the participants and supporters.
